Tree farming is a GROWING business

Proof? Ten years ago, there were only 16 million acres of woodlands on the nation's accredited Tree Farms. Today, there are almost 50 million acres, a three-fold increase. Each Tree Farm is being operated as a private enterprise, growing trees for a regular cash income, just like any other crop.

One of the big reasons why tree farming is a growing business is because the market for wood is growing. Annual consumption of wood products is rising at a steady rate and continues to rise as our economy expands.

The country's tree farmers are able to supply these growing needs because they are employing scientific forestry methods in cutting, harvesting, seeding and through the protection of their timber from fire and disease. This is good news not only for tree farmers and wood-using industries, but also for the nation.
